

 **ADAL STONE**®

Revolution of decorative stones

Revolution of decorative stones

Adal Stone® product line is one of the most exciting innovative building materials in recent years. These light, flexible and ultra-thin sheets of natural stone are the first stones that a woodworker can process with normal tools.

The natural stone veneers' thickness varies from 0.1 to approx. 2.0mm made from large stone slabs. Polyester resin and glass fibre on the backside are holding the grains together. The rough split natural looking surface and the changing colours make each sheet a unique masterpiece and an aesthetically attractive display.

Differences in colour and structure of the rough-split surface are by no means accidental. It is natural stone veneer being formed through millions of years thus uniquely charming. No artificial imitations can ever achieve this.

Easy to process

Easy to process with standard tools by an experienced specialist or do-it-yourselfers.

Unlimited possibilities

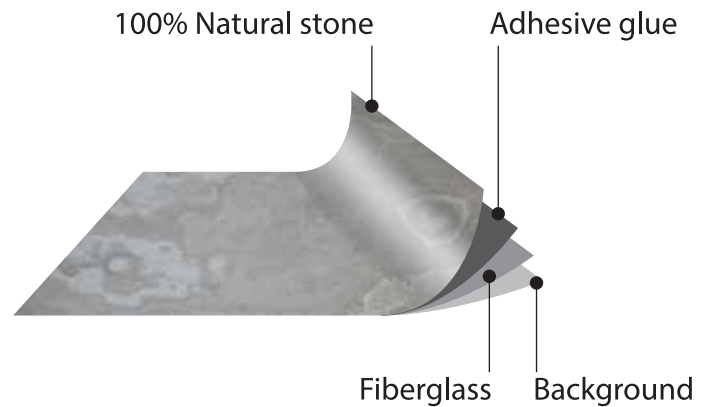

Timesless design with unlimited possibilities for manufacturing furniture or decorating wall, floor and ceiling.

Natural and unique colours

The natural colours are lightfast and UV-resistant offering unique optics from natural stones.

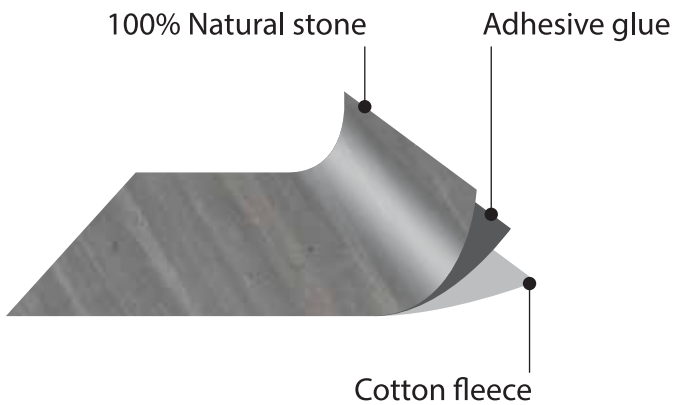

Adal - S series Slim Cover

- 100% Natural Stone Surface
- Thickness: 1.5-2.0 mm
- Weight: approx. 1.5 kg/m²
- Std. size: 1220 x 610mm
- Max. size: 2800 x 1250mm
- Cutting: Use hard-metal tipped circular saw
- Drilling and routing: Use tools for wood or stone
- Flexibility can be increased by applying heat
- Carrier materials: concrete, wood, metal, etc.
- Easy Transportation
- Eco Friendly

Adal - F series Flexi Face

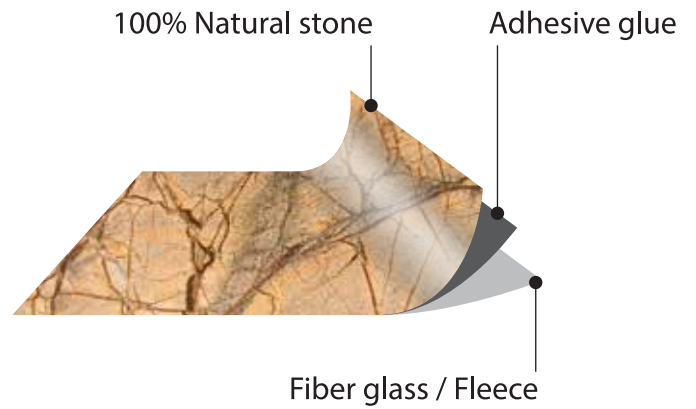

- 100 % Natural Stone Surface
- Thickness: 50µm to 1.0mm
- Weight: approx. 0.8 kg/m²
- Std. size: 1220 x 610mm
- Max. size: 2440 x 1220mm
- Cutting: carpet knife or scissor from the rear side
- Carrier materials: concrete, wood, metal, etc.
- Extremely flexible
- Easy Transportaion
- Eco Friendly

Adal - L series

Light Wall

- 100 % Natural Stone Surface
- Thickness: 1.6 - 2.1mm
- Weight: approx. 1.5kg/m²
- Std. size: 1220 x 610mm
- Max. size: 2440 x 1220mm
- Cutting: hard-metal tipped circular saw, skill saw
- Drilling and routing: Use tools for wood or stone
- Flexibility can be increased by applying heat
- Can be glued to acrylic glass or glass plates
- Translucent material
- Different effects by using warm or cold lights
- Easy installation
- Eco Friendly
- Flexible type: refer specification of Art-F series
